Welcome

Thank you for using our Smart Professional Surveillance System (Smart PSS)!
This user’s manual is designed to be a reference tool for operation of your system.
Here you can find detailed operation information about Smart PSS.
1 Overview and Environment

1.1 Overview

Smart PSS is an abbreviation for Smart Professional Surveillance System. It is software to manage small quantity security surveillance devices. It releases with the device and does not support the products from other manufacturers. It has the following features:

- View real-time video of several camera channels.
- View the playback video files from various cameras.
- Support multiple scheduled arms to realize auto PC guard.
- Support e-map; you can clearly view and manage all device locations.
- TV wall plan setup and can output TV wall video at the same time.
- Realize people counting, behavior analytics, facial recognition, intelligent track. It enters intelligent time.
- It can create individual configuration files for each user, which allows you maintain your own habit and style.
- Support extension applications, can send out alarm information to external programs.

1.2 Environment

<table>
<thead>
<tr>
<th>Item</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>2.4GHz or higher.</td>
</tr>
<tr>
<td>Display card</td>
<td>Independent car and support DirectX 8.0c or higher.</td>
</tr>
<tr>
<td>Memory</td>
<td>1GB or higher for XP OS.</td>
</tr>
<tr>
<td>Displayer</td>
<td>1024×768 or higher.</td>
</tr>
</tbody>
</table>
2 Installation and Upgrade

2.1 Installation

1) Double click “SmartPSS_Setup.exe” to begin installation. See Figure 2-1.

![Figure 2-1](image1)

2) Select installation language from the dropdown list and then click OK button to go to Welcome interface. See Figure 2-2.

![Figure 2-2](image2)

3) Click next button, you can see an interface is shown as in Figure 2-3. Here you can view End user License Agreement.
4) Please check the Accept item and then click Next button to continue. System pops up module installation dialogue box. See Figure 2-4.

5) Check Smart PSS item and then click Next button, you can see there is an interface asking you to specify installation path. See Figure 2-5.

**Note**
You can check PC-NVR item if necessary.
6) After you select installation path click Next button, system begins installation. The interface is shown as in Figure 2-6.

7) During the installation process, you can click Cancel button to exit. After installation, you can see an interface is shown as below. See Figure 2-7.
8) Click Finish button, you can complete the installation.

2.2 Un-installation

1) From Start -> All programs->Smart PSS, select Uninstall Smart PSS item. System pops up the following dialogue box. See Figure 2-8. Please click yes to remove PSS.

2) Click Next button, you can see an interface shown as in Figure 2-9.

3) Check the box here to remove Smart PSS. You can check the box to remove PC-NVR too. Click Uninstall button to remove.
Please choose the components that you want to uninstall. Delete the modules you do not want to install. Click [Uninstall] to continue.

- PC-NVR
- SmartPSS

Figure 2-9
3 Setup

Double click Smart PSS icon, you can go to the login interface.

3.1 Login Interface

Login interface is shown as in Figure 3-1.

- User name: Input the user account
- Password: Please input corresponding password to log in.
- OK: Click this button, system can verify the account and then enter the software main interface.
- Cancel: Click this button to exit login interface.

Note:
- If it is your first time to run the Smart PSS program, default user name is admin and its password is admin too. Admin is a super administrator and can not be removed. It can add, modify or delete other user.
- For security reason, please modify your password after first log in.
- You can memory your password, so that when you can log in the next time, you do not need to input user name and password. Please note this function is for your convenient only. **Do not** enable this function in public PC.

![Login Interface](image)

Figure 3-1

3.2 Main Interface

Click Login button, system begins verifying user name and password and then go to the main interface. See Figure 3-2.
Please refer to the following sheet for detailed information.

<table>
<thead>
<tr>
<th>SN</th>

</tr>
</tbody>
</table>

3.3 Initialization Setup

3.3.1 User Manager
Here you can add, modify or delete a user.

3.3.1.1 Add user

1) Click in the Setting pane, you can go to the following interface. See Figure 3-3.
2) Click Add button, you can see system pops up the following interface. See Figure 3-4.

3) Select user type, input user name, password and confirm password. Input some description information if necessary. Select rights for the new user.
4) Click add button to add a new user. Or you can click Add more button if you want to add more new users.

Please refer to the following sheet for detailed information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>User type</td>
<td>You can select user type from the dropdown list. It includes: manager/operator.</td>
</tr>
<tr>
<td>User name</td>
<td>Please input user name here.</td>
</tr>
<tr>
<td>Password</td>
<td>Please set user password.</td>
</tr>
<tr>
<td>Confirm password</td>
<td>Please input new password again.</td>
</tr>
<tr>
<td>Details</td>
<td>You can input some description information here if necessary.</td>
</tr>
<tr>
<td>User authority</td>
<td>Here you can check the box to select corresponding rights for current user. If the new user is a manager, system checks all rights by default.</td>
</tr>
<tr>
<td>Add more</td>
<td>Check the box here if you want to add more users.</td>
</tr>
</tbody>
</table>

3.3.1.2 Modify or Delete Users

Select a user in the list, and then click to modify, or click to delete it. Or you can select several users and then click the Delete button at the left bottom corner to remove them all.

3.3.2 General

Here you can set system network function, log save time, auto login Smart PSS /Windows or not, picture/record save path.

Click the button; you can go to the basic setup interface. See Figure 3-5.
Figure 3-5

Please refer to the following sheet for detailed information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network function</td>
<td>It is for you to set network function. It includes: &quot;WAN&quot;, &quot;10M&quot;, &quot;100M&quot;, &quot;1000M&quot;.</td>
</tr>
<tr>
<td>Log save period</td>
<td>Here you can set log save time. System automatically overwrites old files once it reaches the period you set here. It includes; 1/2/3/4/5/6-month.</td>
</tr>
<tr>
<td>Auto login Smart PSS</td>
<td>Check the box here, you can login Smart PSS directly without inputting user name and password.</td>
</tr>
<tr>
<td>Auto login Windows</td>
<td>Check the box here and then input user name and password, you can go to the Windows OS after the computer restart.</td>
</tr>
<tr>
<td>Auto sync time</td>
<td>Check the box here to enable time synchronization function and then input synchronization time. Smart PSS can auto synchronize time with the PC at the time you specified.</td>
</tr>
<tr>
<td>Default</td>
<td>Click it to restore system default setup.</td>
</tr>
</tbody>
</table>

File configuration interface is shown as below. See Figure 3-6.
Here you can set snapshot picture and record file default save path.
3.3.3 Device Manager
Here you can add, modify and delete a device. You can also implement device channel group function.

3.3.3.1 Add Device
You can refer to the steps listed below to add, modify or delete a device manually or automatically.

3.3.3.1.1 Auto add

1) Click icon, system goes to the device manager interface; you can see an interface is shown as in Figure 3-7.
2) Click Auto add button, you can see an interface shown as in Figure 3-8.

3) Please check the box to select the devices you want to add and then click the Add button.

3.3.3.1.2 Manual Add
Click Manual Add button, the interface is shown as in Figure 3-9. Please input the corresponding information and then click Add button.
Please refer to the following sheet for detailed information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Function</th>
</tr>

<td>Click it to add more devices.</td>
</tr>
</tbody>
</table>

3.3.3.1.3 Add/Modify Device

Select a device in the list, and then click to modify, or click to delete it. Or you can select several devices and then click the Delete button at the left bottom corner to remove them all.

3.3.3.2 Group Manager

After you add devices, you can set channel group to manage it.

1) Right click the Group management button at the top right pane on Figure 3-7, you can go to the following interface. See Figure 3-10.
2) Click the New group button at the right top corner, you can create new group.

Note

- You can double click group name to change its name. Or you can right click a group name to rename or delete it.

- You can select a group and then click the button to delete it.

3) On the Device list on the left pane, you can select a device. You can view the corresponding channel name on the near pane.

4) Select corresponding channels and then click , you can add channels to the new group you created here. See Figure 3-11.

5) Click Finish button to complete the setup.
Note
For a device or a channel that is not included in the group management mode, you can not view it on the device list of the Preview interface.

Tips
You can use Ctrl+channel to select several channels at the same time. Or you can use Ctrl+A to select all channels.

3.4 Alarm Config

3.4.1 Set Alarm Scheme
You can follow the steps listed below to set an alarm scheme.

1) Click the icon , you can go to alarm configuration interface. See Figure 3-12.
2) Click Add button, you can set scheme information. See Figure 3-13. Please refer to the following sheet for detailed information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scheme name</td>
<td>Please input a scheme name here.</td>
</tr>
<tr>
<td>Memo</td>
<td>You can input some description information here if necessary.</td>
</tr>
<tr>
<td>Time</td>
<td>Input arm/disarm period and select corresponding level.</td>
</tr>
<tr>
<td></td>
<td>- All-day: It is to arm the alarm scheme for a whole day.</td>
</tr>
<tr>
<td></td>
<td>- Period: You can set different periods for each scheme. You can use</td>
</tr>
<tr>
<td></td>
<td>+ to add period, or you can use − to delete period.</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> On period mode, the rest period here refers to the free periods</td>
</tr>
<tr>
<td></td>
<td>you have not set.</td>
</tr>
<tr>
<td>Audio</td>
<td>It is to set alarm sound.</td>
</tr>
<tr>
<td></td>
<td>- Alarm type: It is to select alarm type you want to enable sound</td>
</tr>
<tr>
<td></td>
<td>function.</td>
</tr>
<tr>
<td></td>
<td>- Sound path: Select audio file path. You can click Browse button</td>
</tr>
<tr>
<td></td>
<td>to select the audio file you want to use.</td>
</tr>
<tr>
<td></td>
<td>- Loop play: Check the box here, system can play the audio repeatedly</td>
</tr>
<tr>
<td></td>
<td>when a corresponding alarm occurs.</td>
</tr>
<tr>
<td></td>
<td>- Play: Click it to hear current audio file.</td>
</tr>
<tr>
<td></td>
<td>- Default: For non-customized alarm type, you can click this button</td>
</tr>
<tr>
<td></td>
<td>to restore default setup.</td>
</tr>
<tr>
<td>Others</td>
<td>Check the “E-map flash when an alarm occurs”, you can see the</td>
</tr>
<tr>
<td></td>
<td>corresponding icon on the e-map flashes when an alarm occurs.</td>
</tr>
</tbody>
</table>
3) Set alarm source.

a) Click \[\text{Set alarm source.}\] system goes to alarm source setup interface. Or you can click next button in Figure 3-13 to go to the following interface. See Figure 3-14.

b) Here you can select channel you want to set alarm scheme on the left pane and then check the alarm type.

c) Click \[\text{Add alarm source to the right pane.}\]
Note
You can select corresponding alarm source on the right pane and then click to delete an alarm source.
4) Click OK button, you can view the scheme information on the alarm configuration interface. See Figure 3-15.

![Figure 3-15](image)

Note
- If you want to set alarm activation video, you can click Next button in Figure 3-14, or you can click to set.
- In Figure 3-15, you can select an alarm scheme and then select Delete button to remove.

3.4.2 Alarm Activation Video
This function allows you to set activation video when an alarm occurs.

1) Click icon , you can go to alarm configuration interface.

2) Double click the , system goes to alarm activation video interface.

Or you can check a scheme and click the modify button, click to go to alarm activation video interface.

3) Select alarm source on the left pane.
4) Click link video to set preset and stay time, check the activation channel and click.

Now you can view the alarm activation video on the right pane. See Figure 3-16.

![Figure 3-16](image)

**Note**
- In Figure 3-16, you can double click preset or stay time to change its contents.
- You can select a scheme and then click to remove activation video.

5) Click alarm output, you can go to alarm output interface. See Figure 3-17.
6) Here you can check the box to enable auto output device function and input stay time.

   Please select channels from the device channel list and then click to add activation output. Or you can change setup directly on the right pane.

7) Click OK button to complete setup.
3.4.3 Enable/Disable/Export Scheme

After you added scheme, click the Open on State column, you can see it becomes disable. Click it again to enable current scheme, you can see state is open now. Click button to import/export scheme.

3.5 TV Wall Configuration

This function allows you to output video to the TV wall. Please follow the steps listed below.

1) Click , system goes to TV wall setup interface. See Figure 3-18.
2) Click Add TV wall button, you can input TV wall name and description.

3) at the bottom of the interface is for you to set 1*1, 2*2, 3*3 or 4*4 TV wall. Click the screen here to draw TV wall layout. See Figure 3-19.

![Figure 3-19](image)

**Note**

- You can click , input your customized TV wall layout.
- Use Ctrl+left click mouse to select several screens, right click mouse to select splicing or click , you can combine several screens to a splicing screen. Right click mouse, select unbind splicing or click , you can cancel splicing.
- Select a screen and right click to select rename or delete, you can rename screen name or delete a screen. Click , you can delete all screens.

Click Next button or select , you can go to TV wall input binding interface.

4) Binding decoder channel
Select a decoder channel and then drag it to the corresponding screen of the TV wall. See Figure 3-20.
Click Next button, or click Finish button, you can go to enable status interface.

5) Check the box to enable setup immediately and then click Finish button, you can see an interface shown as in Figure 3-21.

In Figure 3-21, double click a TV wall, or select a TV wall and then click Modify button, you can change its setup. You can also click Delete button to remove.

### 3.6 Tour

It is to realize monitor tour among each window. Please follow the steps listed below to set.
1) Click icon , you can go to monitor tour interface.
2) Click Add button to go to add task interface. See Figure 3-22.
3) Input task name, task description, and select window amount.
4) Drag channel(s) on the right pane to the list on the left pane.
   • You can use / button to adjust tour sequence. You can click button to channel(s) you have added.
   • Double click newly added channel, you can change stay time, preset and bit stream type.

![Figure 3-22](image)

5) Click OK button, you can see an interface shown as in Figure 3-23.
In Figure 3-23, you can click button or to import/export tasks. You can select a task and then click or to change or modify task.

3.7 PC-NVR

This function allows you to storage record file on the PC to effectively use wideband. You can add, modify or delete PC-NVR and set PC-NVR parameter. Please follow the steps listed below.

1) Click icon , you can go the PC-NVR interface. See Figure 3-24.
2) Add PC-NVR
   a) Click Add button, you can see an interface shown as in Figure 3-25.

   ![Figure 3-25](image)

   **Figure 3-25**

   b) Please input PC-NVR name, IP, port, user name and password.

   c) Click Add button. You can go to Figure 3-24 to see there is a newly added item under service list. See Figure 3-26.
Tips
You can click Auto search button in Figure 3-24 or Figure 3-25 to add searched PC-NVR directly.

3) Set PC-NVR
   a) In Figure 3-26, click Setup button on the left pane, you can go to the setup interface.
   b) You can see there are four items on the left pane: General setup, network setup, user manager and disk manager. Here you can set system time, record length, device name, port number and etc.
   c) Select disk manager, you can select a disk and then click to implement disk allocation operation. See Figure 3-27.
4) Binding record channel
Click Record button, drag the device channel on the device list to the corresponding of the PC-NVR, click Save button.

5) Save record storage plan
   a) Click RecordPlan button, you can go to the following interface. See Figure 3-28.

   b) Select a channel from the dropdown list and click Set button. System pops up the following interface for you to set. See Figure 3-29.
Figure 3-29

c) Please set the corresponding time and then click OK button.

**Tips**
After you complete setup for one channel, you can click Copy button in Figure 3-28 to copy current setup to other channel(s). Please drag the channel to another channel you desire to save the setup.
4 Basic Operation

4.1 Preview

4.1.1 Real-time Preview
After you set channel group, you can realize real-time preview, record, snap, PTZ operation and etc.

On the main interface, click , you can go to the preview interface. See Figure 4-1.

Please refer to the following sheet for detailed information.

</tbody>
</table>

4.1.2 Record  
During the preview process, you can follow the steps listed below to record.  
On the preview interface, right click mouse and then select record button.  
Or you can click the button at the top of the video window to record.  
The icon becomes when device is recording.  
You can right click mouse to select stop record or click the at the top of the video window to stop record.  
The default record save path is SmartPSS/Record. Here you can go to chapter 3.3.2 General and then select file setup icon to modify record save path.

4.1.3 Snapshot  
During the preview process, you can follow the steps listed below to snapshot.  
1) On the preview window, right click mouse and then select snapshot. You can see system pops up snapshot dialogue box. See Figure 4-3.  

Tips  
You can also click at the top of the video window to snapshot.

Figure 4-3
2) Please select corresponding parameter from the snapshot reason dropdown list and then input the information in the Remarks column.

3) Click save button, you can see system prompts “Successfully snapshot”.

On the Preview window, right click mouse and then click Triple snapshot, you can snap three pictures at one time. You can see the corresponding dialogue box if the snapshot succeeds. The default picture save path is SmartPSS/capture. Here you can go to chapter 3.3.2 General and then select file setup icon to modify picture save path.

4.1.4 PTZ

If the device type is Speed dome, you can click the PTZ button to set. See Figure 4-4.

### Item | Function
--- | ---
Focus | It is to adjust video definition.
Iris | It is to adjust brightness.
Preset | You can set camera to a specified preset. Use direction keys to move the camera to your desired location and then input preset value. Click Set button, you have set one preset.
Tour | This function allows the camera to move between several presets. Please note as long as your speed dome supports preset function, it supports tour function.
Aux | It is to call light, wiper, PTZ menu, auto rotation, aux 1, and aux 2.

#### 4.1.4.1 Preset
This function allows you to set camera to a specified position.

**Preset setup**

1) In Figure 4-4, Use direction keys to move the camera to your desired location.
2) Click Preset button and then click setup button; you can see an interface shown as in Figure 4-5.
3) Input preset number and name, click Setup button on the right pane.
4) Click OK button to complete the setup.

![Figure 4-5](image)

**Call preset**
In Figure 4-4, click Preset button, select a value from the dropdown list and then click Goto function, you can call a preset.

#### 4.1.4.2 Tour
This function allows camera to go between several presets.

**Important**
Before you use this function, please set at least two presets first.
Tour setup
1) In Figure 4-4, click Tour button and then click Set.
2) System pops up the following dialogue box. See Figure 4-6.

![Tour List](image)

Figure 4-6

3) Click New button, you can see the following interface. See Figure 4-7.
4) Input tour number and tour name and then select preset number from the dropdown list.
5) Click Add button to add one preset to the tour. Select another preset number from the dropdown list and then click Add button again to add more preset to the tour.
6) Click OK button to complete the tour setup.

![New Tour](image)

Figure 4-7

Now you can see an interface shown as in Figure 4-8.
Click Quit button to exit.

**Call tour**

In Figure 4-4, select corresponding tour value from the dropdown list and then click Start button, you can call it.

### 4.2 Playback

After you recorded a file, you can go to this interface to playback.

On the main interface, click , you can go to the playback interface. See Figure 4-9.
4.2.1 Playback Record

Important
System can only search records of the storage plan. It can not search the local record (The record files are saved to the default path “SmartPSS/Record”).

Please follow the steps listed below to search the record you want and then playback.
1) Check channel on the device list on the top right pane.
2) Select search time.
3) Click the button on the left bottom to select record type.
4) Click Search button. You can see corresponding date is green if there is a record on current data. You can see the corresponding dialogue box if there is no record.
5) Now you can see playback window. See Figure 4-10.

Figure 4-10

</tbody>
</table>

**4.2.2 Record List**

Click ![Image](image11.png) button at the top right corner of the playback window. System pops up the following interface. You can set to download by time or by record.

Click by file, check the file(s) you want to download and then click Download button. See Figure 4-11.
Click to select download by time, please input download period and then click Download button. See Figure 4-12.

![Figure 4-11](image1)

**Figure 4-11**

During the download process, you can click the download manager at the right bottom to view download status, current download operation and download records. See Figure 4-6.

Here you can implement download, pause, delete operation and etc.

![Figure 4-12](image2)

**Figure 4-12**
If you have set alarm scheme, you can see the corresponding alarm in the Alarm manager interface. You can refer to chapter 3.4.1 to set alarm scheme first.

Click icon on the main interface, you can go to Alarm manager interface. See Figure 4-14.
Click alarm list, system displays all alarms and can display them by their level. Click query list, check corresponding channel on the right pane and then select alarm type, start time. Click Search button, you can see all alarm records matching the criteria you set here. See Figure 4-15.

4.4 Alarm Activation

If you have set alarm activation video function in your alarm scheme setup (chapter 3.4.2), you can see system pops up video window when a corresponding alarm occurs. See Figure 4-14. If you check the box at the bottom of the interface to pause refresh, the new alarm activation video will not overwrite current one. Click Alarm Manager at the right bottom of the interface, system goes to the alarm manager interface for you to view the corresponding alarm record.
After you set TV wall setup (chapter 3.5), you can output video to the TV wall. You can follow the steps listed below to set.

1) **Click icon** [Image 127x555 to 468x780] on the main interface, you can go to the following interface. See Figure 4-17.

2) **Select corresponding TV wall from the screen information dropdown list.** You can check to select real-time mode if necessary. Once you enable real-time mode, system automatically output the video to the TV wall after you complete the setup. Otherwise, it does not output the video to the TV wall.

3) **Drag the channel on the right pane to the corresponding screen and then binding.**

**Figure 4-17**
Tips

Select one screen and then use the process bar you can set four modes: 1/4/9/16-window. You can see the corresponding dialogue box, if current screen does not support the mode you set here.

4) Click save as task button, you can see system pops up a dialogue box for you to input task name.

5) Please input task name and click Save button.

6) Click Output video.

Please note:

- You can select TV wall task from the task name dropdown list and then click the Output video button to view the video.
- Click task manager, you can view current task status. Or you can select one task and click or to modify or delete current task.

4.6 E-map

Click icon on the main interface, you can go to the e-map interface. You can view the device on the e-map. On the preview map interface, you can zoom e-map or open video, but you can not edit it. On the Edit e-map interface, you can edit e-map, add camera and etc.

4.6.1 Edit E-map

Click , you can go to the following interface. See Figure 4-18. Click Tools, you can edit e-map, delete e-map, delete device, add area, modify area, delete area and etc. Drag a channel on the right pane to the e-map; you can add it to the e-map.

Figure 4-18
If you are in full-screen mode, you can see a function bar shown as below. See Figure 4-19.

![Function Bar](image)

**Figure 4-19**

Please refer to the following sheet for detailed information.

<table>
<thead>
<tr>
<th>Item</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modify e-map</td>
<td>It is for you to change e-map name, picture, description</td>
</tr>
<tr>
<td>Delete e-map</td>
<td>Delete current e-map.</td>
</tr>
<tr>
<td>Delete device</td>
<td>Delete a device from the e-map.</td>
</tr>
<tr>
<td>Add area</td>
<td>Add hot zone on the e-map.</td>
</tr>
<tr>
<td>Modify area</td>
<td>Change hot zone map name, picture and description.</td>
</tr>
<tr>
<td>Delete area</td>
<td>Delete corresponding hot zone.</td>
</tr>
</tbody>
</table>

**4.6.2 Preview E-map**

After you edit e-map, you can click Preview button to view. Buttons at the left top of the interface can zoom in, zoom out or move e-map. Double click a camera on the e-map, you can view video. See Figure 4-20.

![Preview E-map](image)

**Figure 4-20**

**4.7 Device Display Control**

The device type supports NVR6000 series product only. Here is for you to set split mode and display channel.
Click icon , you can go to the following interface. Drag a channel on the right pane to the window to bind.

Click the window display mode setup button at the bottom of the interface; you can see the 128-channel of the NVR6000. In Figure 4-21, you can view the 4-split mode. You can click channel range to select corresponding channel.

Move the mouse to a window, click , you can switch between main stream/extra stream/auto.

Click to cancel binding. Or you can right click mouse to cancel binding or change bit stream type.
